

Anteiku - Founder Research & Product Strategy

Executive Summary

Profit leakage SaaS for independent cafes and bakeries focused on waste, supplier costs, and profitability insights.

Core Problem

Owners know waste exists but cannot quantify its financial impact. Existing tools are expensive or overly complex.

Competitor Analysis

MarginEdge, MarketMan, Restaurant365, and Crunchtime focus on inventory, accounting, and enterprise workflows. Opportunity: simplicity and profitability visibility.

Must-Have Features

Waste logging, profit leakage dashboard, invoice upload, supplier price tracking, weekly recommendations, reports.

Why Customers Pay

Show exact money lost, supplier cost increases, projected annual losses, and actionable savings opportunities.

Roadmap

Phase 1: waste logging. Phase 2: invoice OCR. Phase 3: AI insights. Phase 4: POS integrations.

Landing Page

Headline: Stop Guessing Where Your Cafe Is Losing Money. CTA: Calculate My Waste Losses.

Success Metrics

Retention, weekly active businesses, waste logs, trial-to-paid conversion, customer-reported savings.
