

# Anteiku Master Implementation Plan

Founder Build Bible for a cafe and bakery profit-leakage SaaS.

## 1. Product Vision

Anteiku helps independent cafes understand where profits are leaking through waste, supplier price increases, and operational inefficiencies. Positioning: 'Stop Guessing Where Your Cafe Is Losing Money.'

## 2. Target Customer

Independent cafes, bakeries, specialty coffee shops, and small chains with 1-10 locations, primarily in Europe.

## 3. Competitor Analysis

MarginEdge: powerful but expensive and complex. MarketMan: inventory-heavy. Restaurant365/Crunchtime: enterprise-focused. Opportunity: simple, affordable profitability intelligence.

## 4. Core Features

Waste logging, dashboard, reports, invoice OCR, supplier cost tracking, recommendations, subscriptions.

## 5. Landing Page

Hero, problem section, solution section, dashboard screenshots, pricing, FAQ, CTA. Focus on profit loss rather than sustainability.

## **6. Technical Architecture**

Frontend: Next.js, Tailwind, shadcn/ui. Backend: Supabase Auth, PostgreSQL, Storage, Edge Functions. Billing: Stripe. Email: Resend.

## **7. Database**

Profiles, Businesses, Memberships, Locations, Catalog Products, Business Products, Waste Logs, Reports, Recommendations, Supplier Imports, Subscriptions.

## **8. Phase 0 - Validation**

Create landing page, collect leads, interview 20 cafe owners, validate willingness to pay. Exit criteria: at least 5 strong purchase signals.

## **9. Phase 1 - Authentication & Onboarding**

Signup, login, Google auth, business creation, membership management. Exit criteria: owner can create account and business.

## **10. Phase 2 - Product Catalog**

Search catalog, create business products, set prices. Seed with 1000+ products. Exit criteria: setup completed in under 5 minutes.

## **11. Phase 3 - Waste Logging**

Fast waste entry flow. Search product, enter quantity, reason, save. Exit criteria: waste entry under 10 seconds.

## **12. Phase 4 - Dashboard**

Show daily, weekly, monthly waste costs, annual projections, top waste items, trend charts.

## **13. Phase 5 - Reports**

PDF, CSV, Excel exports. Monthly reports and accountant-ready summaries.

## **14. Phase 6 - Invoice OCR**

Upload supplier invoices, extract products and prices, map to catalog, update costs automatically.

## **15. Phase 7 - Supplier Cost Intelligence**

Track historical prices and notify owners about cost increases affecting margins.

## **16. Phase 8 - AI Recommendations**

Generate recommendations with estimated savings based on waste patterns and cost trends.

## **17. API Design**

Endpoints for auth, products, waste logs, dashboard, reports, invoices, recommendations.

## **18. Customer Acquisition**

Direct outreach, pilot customers, bakery communities, LinkedIn, referrals, accountant partnerships.

## **19. Pricing**

Starter €19/month, Pro €39/month, future multi-location plans.

## **20. Launch Checklist**

Domain, emails, Stripe, privacy policy, terms, onboarding, analytics, backups, support process.
